

Shubham Pawar

WEB PENETRATION TESTER

Summary

I'm a skilled penetration tester focused on network security, ethical hacking, and reducing security risks. Known for being productive, I use advanced methods to find and analyze vulnerabilities. My approach ensures that security weaknesses are identified and fixed quickly and accurately, keeping systems and data protected. I apply strong technical knowledge to assess potential threats, plan defenses, and respond to any security issues with precision.

Certification

Palo Alto Cybersecurity Virtual Internship

Palo Alto

Completed hands-on training in cybersecurity fundamentals, including firewall management, threat analysis, and network security best practices.

Burp Suite Essential Training

LinkedIn Learning

Gained practical knowledge in using Burp Suite for web application security testing, covering essential tools for vulnerability detection and exploitation.

EC-Council Ethical Hacking Essentials (EHE)

EC-Council

Built foundational skills in ethical hacking, covering core concepts in information security, vulnerability analysis, and risk management.

Experience

Web Penetration Tester

Freelance / Independent Security Researcher

Sep 2023 - Oct 2024

- Performed comprehensive security assessments for web applications, identifying critical vulnerabilities such as directory listing, input validation flaws, and sensitive data exposure.
- Reported valid security bugs to renowned organizations, including NASA, CyberGhost, and secured multiple other websites, enhancing their overall security posture.
- Proficient in using tools like Burp Suite, Wireshark, Metasploit, Nmap, and Nessus for vulnerability discovery, exploitation, and network analysis.
- Automated various penetration testing tasks using Python, improving testing efficiency and accuracy.
- Active participant in bug bounty programs, contributing to the security of numerous platforms by reporting vulnerabilities

Education

Bachelor in Computer Science

Annasaheb Dange College Of Engineering & Technology, Ashta 416301

Oct 2022 - May 2026

Skills

- Web Application Testing
- Vulnerability Assessment
- Malware Analysis
- Network Security
- Penetration testing tools
- Social engineering
- Reporting and documentation

Achievements

Received Appreciation Letter

NASA 2024-09-24

Awarded an appreciation letter by NASA for identifying and responsibly disclosing critical security vulnerabilities, contributing to the enhancement of their security posture.
